COM TÚ

In 2015 René Barbier Sr. and my brother René Barbier Jr. started a new project in La Figuera: Com Tú.

Given my love for La Figuera and the possibility of starting a new project in the area, I jumped in with my father and my brother to create a new wine. Com tú.

The property where this magic occurs is called Miramar, located at 580m. above sea level. The vines are 100% Garnatxa, mostly between 35-50 years old and some are even centennial. The soil is mostly red clay and has a bit of limestone. On the land, apart from vines, we can also find almond and apple trees and a small farmhouse.

The 2016 crop was very promising, after a slow and delicate but effective eighteen months fermentation, in foudre. This gave the wine its complexity; mineral force together with a light orange peel fragrance and a taste that reminds us of red berries (cherries, strawberries,...).

Why Com tú? It is a mixture between the Barbier philosophy and mine. It is a homage to all people, it does not matter the color of their skin, their gender, whatever face or body they have, whether they have a disability or not, whether they are rich or they live hand to mouth, whether they have studies or not. The name of the wine has to remind you that we all are the same within. We all share basic needs, those make us human, those make us equal. In summary, I am like you (Com tú), you are like me.

2016

On the other hand, the label is the result of a collaboration between my mother Isabelle, a great artist, and myself. If you look at it closely enough you will see two eyes, and within them a man and a woman, of a different race, holding hands through the glasses. They need each other so the glasses don't fall off. This is the way I see that there is no future for men without women, no future with ethnic groups confronted; strength comes in numbers. The nose is my signature.

There is no edge on the picture, this gives people freedom to decide whether it is a man or a woman. The name of the wine is written over the mouth with different type of letters. The "C" refers to my curly hair. The "O" refers to the mouth, like the shape of an open door, (by the way, this is the same symbol the Japanese use;) open up and communicate among ourselves in order to avoid confrontation, in a world where war has already caused enough harm. The "M" for music, that soothes the animals and brings about peace (at least it does to me). The "T" are two pencils put together in perpendicular, as I like writing. And last but not least, the "U" is a bush, being a lover of nature as I am, it had to be there.
